### Abstract of JP 2003010560 (A)

**PROBLEM TO BE SOLVED:** To provide a toy comprising a molded body which is constituted of a thermoplastic elastomer having an excellent flexibility and mechanical strength, and is excellent in coating property and printing property as well.  
**SOLUTION:** This toy comprises the molded body which is molded of a thermoplastic elastomer composition. In this case, the thermoplastic elastomer composition is constituted of 10 to 75 pts.wt. of an aromatic vinyl based polymer, or a thermoplastic resin the major component of which is the aromatic vinyl based polymer (a), and 25 to 90 pts.wt. of a rubber-form polymer which is partially or totally crosslinked (b).
